System Requirements

The following outlines the minimum system requirements for GroupDrive:

- Operating System: OS X v10.5 (Leopard) or later
- Processor: Intel or PowerPC processor based Macintosh
- Disk Space: Minimum 40MB free disk space (for product and caching space)
- Internet Connection: A direct or wireless Internet connection
- MacFUSE: V.2.0 or later. GroupDrive will attempt to install MacFUSE if it is not on your computer; or you can download MacFUSE here: <http://code.google.com/p/macfuse/>

Before installing GroupDrive, run Mac software updates.

Installation Notes

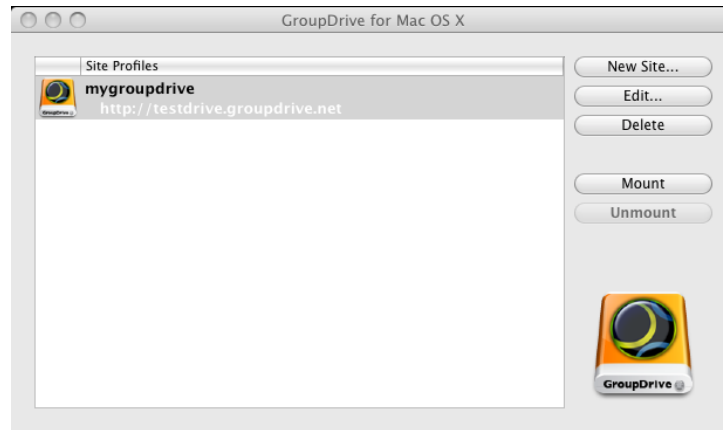

Before installing GroupDrive, run Mac software updates.

To Remove GroupDrive:

1. Delete GroupDrive from the **/Applications** folder.
2. In Finder, under your **Home** folder, go to **Library>Application Support** and delete the GroupDrive folder. This will delete your Site Profiles.

Using the Site Manager

Use GroupDrive's **Site Manager** to define your site profiles, add or edit site information, and to mount your servers as a virtual drive.

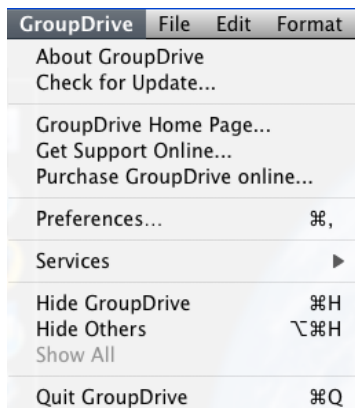

- **New Site** - Click **New Site** to create new site profiles.
- **Edit** - Select the site profile that you would like to edit and then click **Edit**.
- **Delete** - Select one or more sites and then click **Delete**.
- **Mount** - To connect to the server, select the site profile and then click **Mount**. To view the mounted drive, in Finder, select **Go>Computer**.
- **Unmount** - To disconnect from the server, select the site profile and then click **Unmount**.

Using the GroupDrive Menu

You can use the GroupDrive menu to:

- **About GroupDrive** - View the GroupDrive version and build number. This will be helpful if you need to contact technical support.
- **Check for Update** - Use this utility to check for program updates and to download new versions.
- **GroupDrive Home page** - Click to visit the GroupDrive/South River Technologies, Inc. home page.
- **Get Support Online** - Click to see the GroupDrive Support page, which contains links to online help, the technical support desk, and the knowledge base.
- **Purchase GroupDrive online** - Click to see the GroupDrive Purchase page and online shopping cart.
- **Preferences** - Allows you to configure application-wide options.

Support/Troubleshooting

FAQ

Q. - How can I prevent DS_Store files from being created over network connections?

A. - To configure a Mac OS X user account so that .DS_Store files are not created when interacting with a remote file server using the Finder, follow the steps below.

Note: This will affect the user's interactions with SMB/CIFS, AFP, NFS, and WebDAV servers.

1. Open the Terminal.
2. Type: **defaults write com.apple.desktopservices DSDontWriteNetworkStores true**
3. Press **Return**.
4. Restart the computer.
